

Brain surgery Surgery of spine and spinal cord FUNCTIONAL SURGERY 7 Congress of faiths

Brain surgery Surgery of spine and spinal cord FUNCTIONAL SURGERY 7th Congress of the spine with the educational course SRS The Department is organized on the basis of the Institute of neurology in 1965, E. I. Candela. The priority of the office was functional neurosurgery and virtually throughout its history, was the only Russian institution where he applied stereotactic technology. Under the leadership of Eduard Izrailevich was used stereotactic treatments of brain pathology. In 2011 the Department was headed by Professor M. D., Gushcha, Artem Olegovich. Since his arrival widened the range of therapies applied in routine practice of the Department and began to develop endoscopic techniques. At the moment, the Department has all the possible methods used in neurosurgical practice. Based at the Research Center of Neurology our Department possesses unique potential recovery of patients in a neurological rehabilitation hospital.
